Computer Science Expert Ph.D., Divinity, St. Andrews University M.S., Psychology, University of Edinburgh B.A., History, Rutgers University More than 30 years of experience as a computer programmer and software engineerSpecializes in Python language, text processing, and database systemsWrote MySQL for Python (Packt Publishing, 2010)The principal of Lukaszewski Consulting ServicesProfessional membership in several industry organizations Albert (Al) Lukaszewski, Ph.D., is a former writer for ThoughtCo who wrote about the Python programming language for more than three years. Among his topics were, the power of Python's string templates, and how to analyze a file line by line. Dr. Lukaszewski has more than 30 years of experience as a programmer in text processing, database systems, and natural language processing (NLP). In addition to being an expert on Python, he received various accreditations including certification in C and C++ programming. His book, MySQL for Python (Packt Publishing, 2010) is a practical tutorial for intermediate users who want hassle-free access to their MySQL database through Python. Dr. Lukaszewski is a member of several professional societies, including the Association for Computing Machinery (ACM) and the Institute of Electrical Electronics Engineers (IEEE). Education Albert Lukaszewski earned a Doctor of Philosophy (Ph.D.) from St. Andrews University in 2005. He also holds a Master of Arts in Teaching (MAT) from Fuller Seminary and a Bachelor of Arts (B.A.) degree from Rutgers University.Awards and PublicationsMySQL for Python (Packt Publishing, 2010) ThoughtCo and Doldash Meredith ThoughtCo, a Doldash Meredith brand, is an award-winning reference site offering education content created by experts. Stock Market Today (5/20/22): S&P 500 Narrowly Escapes Bear TerritoryThe S&P 500 was on pace Friday to finish more than 20% below its January record highs, but a late recovery kept the bear at bay for at least one more ...Best Buy (BBY) Headlines Busy Week of Retail EarningsOur preview of the upcoming week's earnings reports includes Best Buy (BBY), Dollar Tree (DLTR) and Deere (DE).13 Best Infrastructure Stocks for America's Big Building SpendThese 13 infrastructure stocks represent several themes that could enjoy a boost now that America's \$1.2 trillion infrastructure bill has become law.5 Beaten-Down Stocks to Buy on the DipThe market has delivered some nauseating volatility of late. The good news? That has teed up a few great stocks to buy at a discount. Stock Market Today (8/25/21): Financials Lead as S&P 500, Nasdaq Set Fresh HighsUpward pressure on Treasury rates Wednesday helped spur gains in the financial sector on a modest up day for the major indexes.5 Best Industrial Stocks for the Economic RecoveryAs the global economy continues to rebound, this list of industrial stocks could benefit.Stock Market Today 5/21/21: Dow Gets a Lift From Boeing, Energy StocksThe Dow managed a win on strength in Boeing, but the S&P 500 and Nasdaq weren't so resilient.Stock Market Today 2/19/21: Stocks Tread Water, Bitcoin Joins the Trillion-Dollar ClubThe Dow finished flat as a pancake as the stock market continues to stall against all-time highs, but Bitcoin continued building a head of steam. Medically Reviewed by Arefa Cassoobhoy, MD, MPH on November 20, 2020 Many things about amyotrophic lateral sclerosis (ALS), also known as Lou Gehrig's disease, remain unclear. Without knowing exactly what causes ALS, it's hard to tell why some people get the disease while others don't. Researchers do have some possible ideas, however.ALS disrupts your motor neurons. These are nerve cells that control important muscle activities, including breathing, talking, swallowing, and walking. Over time, the loss of muscle control becomes worse. There is no cure for ALS, although research is ongoing. There are no preventive steps either.It's rare, affecting about 5.2 people per 100,000 in the U.S. population, according to the National ALS Registry. Because of the seemingly random nature of the condition, it's hard for researchers to pinpoint who might have a greater chance of getting it.Doctors have learned some things from people who have this condition.● Sex: About 60% of people with ALS are male.● Race: 93% of people with it are white.● Aging: Although the disease can strike at any age, symptoms most commonly develop between the ages of 55 and 75. You can get it earlier, though having it before 30 is very rare.● Family history: A small percentage of ALS cases are passed down from family. There are two main kinds, depending on whether the disease runs in your family.● Sporadic: This makes up 90% to 95% of all ALS cases, as it occurs in people who have no known family history of the disease nor any clear things that would make them more likely to get it. Other family members are not expected to be at risk for inheriting ALS in sporadic cases.● Familial: In about 5% to 10% of cases, ALS runs in the family. If you have familial ALS, there is a 50% chance that your children will get it as well.Scientists are looking into whether genetics, things in the environment, or a combination of both cause ALS. Some theories suggest people who might already be genetically at risk for ALS get the disease after some kind of contact with an outside "trigger" in their environment, such as being around a toxin. Scientists have found over a dozen mutations in genes that have ties to ALS, but the two major ones are C9orf72 and SOD1 genes.C9orf72 gene: Mutations in the gene known as C9orf72 have been found in about a third of all familial cases and a small percentage of sporadic ones. Scientists have also found that this defect on the C9orf72 gene is tied to what's called "frontotemporal dementia (FTD)," an uncommon form of dementia. Some researchers think that ALS and some forms of FTD are related.SOD1 gene: Mutations on this gene appear in about 20% of familial cases and 1% to 5% of sporadic ones. It's unclear how the mutations lead to ALS. Research has found that the proteins from a mutated SOD1 gene can become toxic.Scientists are also looking at whether things in the environment such as chemicals and other agents can raise your chances of getting ALS. But it's been hard for them to prove anything specific so far. Some things they are looking into: Smoking: Smoking is believed to be the only probable factor that may raise your chances for ALS. But this may be true mainly for women, especially those after menopause. This link is controversial among doctors.Contact with toxins: Lead and other chemicals may be linked to ALS, but no single agent has been consistently found to be a cause.Military service: Studies have found that military veterans, especially those deployed during the Gulf War in 1991, have a greater chance of ALS. The exact causes remain unclear, but may include contact with chemicals or metals, injuries, infections, or the intense physical activity needed to serve. Those who were in the Gulf War are more likely to get ALS compared with other veterans.Intense activity: The most famous person to have ALS was Lou Gehrig, the baseball player who died from it. Studies have shown a higher chance among athletes, who are very active. But the studies have been small, so it's too early to say that being an athlete means you have a greater chance of getting the condition. Your work: Several lines of work -- including sports, cockpit, construction, farm, hairdressing, lab, veterinary, and welding, among many others -- have been reported to carry a higher chance of ALS. These jobs often involve some kind of contact with pesticides, metals, and chemicals. But the common, underlying risk has not been found.Where you live: Clusters of ALS cases have been reported on the Pacific island of Guam and in the Kii Peninsula in Japan, which have rates 50 to 100 times higher than other parts of the world. Such clusters have also been reported in South Dakota and Italy. © 2020 WebMD, LLC. All rights reserved. Simply call the number below and ask to speak to a funeral director to discuss your needs. Chapel Hill Funeral Home 542 West 52nd Street Anniston, AL 36206 Prosecco is a festive drink, and Venetians seem ready to pop open a bottle for almost any occasion. Join the party at Al Prosecco, where the sparkling wine of the Veneto is featured. There's plenty else besides prosecco, including biodynamic and organic wines, plus tempting platters of charcuterie, artisanal cheeses and panini. Sitting at one of the tables on the tree-shaded piazza, enjoying a spritz or a bottle of bubbly and watching the world go by—Venice doesn't get much better than this. Time Out tip: Prosecco is an anytime drink in Venice, so don't be bashful about stopping at Al Prosecco for a mid-morning snack and sparkling wine break.
